Problem Statement

Problem

Teachers and students struggle to manage online learning due to scattered tools for classes, materials, assignments, and communication.

Impact

Teachers face heavy workload, students feel confused and disengaged, institutions see inconsistent outcomes, and parents lack progress visibility.

Problem Statement/Industry

Problem Being Solved

Schools and teachers are struggling to effectively cope with online learning. The teachers use many unrelated tools to organize classrooms, distribute materials, issue assignments, track attendance, and assess submissions, which complicates the work.

Supporting Data

Research shows that more than 7 in every 10 teachers have reported an augmented workday as a result

Problem Analysis

Affected Stakeholders

Educational institutions, parents, teachers and students are the ones influenced.

Educators have difficulties organizing classes, materials, assignments, and evaluations with the help of various tools.

Students are challenged in terms of accessing structured resources, monitored work and remained involved.

Impact on Stakeholders

Teachers experience increased workload and time pressure.

Students may face confusion, disengagement, missed deadlines, and lower academic performance. Institutions risk reduced efficiency and inconsistent learning outcomes.

Parents may feel uncertain about their children's progress and learning quality.

Root Causes

The problem exists due to the use of multiple disconnected tools for managing online classes, materials, assignments, and communication. Traditional teaching and assessment methods are not fully adapted to digital environments, and increasing class sizes add to the difficulty.

Personal/Team Connect

Online learning has proved challenging to us as students in terms of accessing materials, following assignments and being organized. We have also witnessed teachers struggling with work load and coordination and this has pushed us to solve this problem.

Jobs-to-be-Done

Functional JTBD

- Distribute course materials efficiently to all students. - Track attendance without manual effort. - Create and assign quizzes or question papers easily. - Collect and evaluate student submissions (including handwritten notes via OCR). - Monitor student progress and certify course completion.

Emotional JTBD

- Feel confident managing online classrooms without stress. - Gain satisfaction from organized teaching and student progress. - Reduce frustration caused by juggling multiple tools. - Build trust with students through smooth communication. - Feel supported by AI tools that simplify quiz creation and evaluation.

Social JTBD

- Be recognized by peers and students as effective online educators. - Maintain professional credibility by using modern digital tools. - Strengthen collaboration with students through seamless communication.

Current Alternatives

- Using separate apps for classroom organization, file sharing, and communication. - Manually tracking attendance in spreadsheets or paper records. - Creating quizzes or assignments .

Gaps in Current Alternatives

- Fragmentation: Teachers juggle multiple apps (classroom, file sharing, attendance, quizzes), which wastes time. - Manual effort: Attendance, grading, and feedback often require repetitive manual work. - Lack of integration: Tools don't sync, forcing teachers to copy data across platforms.

Our Solution

Solution

A unified LMS using MERN, Clerk, Gemini, and Tesseract. It streamlines classrooms, assignments, attendance, and certificates, solving teacher pain points with fragmented tools.

Core Technologies/ Methodologies

MERN stack for app, Clerk for auth, Gemini for AI quizzes, Tesseract for OCR, enabling secure, scalable classroom and assignment management.

Solution Design

Our Solution

A unified LMS using MERN, Clerk, Gemini, and Tesseract. It streamlines classrooms, assignments, attendance, and certificates, solving teacher pain points with fragmented tools.

Key Features

Unified LMS with role-based access, AI quiz generation, OCR for handwritten notes, attendance tracking, assignment management, progress monitoring, and certificate issuance.

Uniqueness

Combines MERN expertise with Clerk auth, Gemini AI, and Tesseract OCR. Unlike fragmented tools, it offers an integrated, scalable solution tailored to teachers' needs, boosting efficiency and trust.

Solution Format:

Digital Product & Service (Unified LMS)

Core Technologies/ Methodologies:

MERN stack for app, Clerk for auth, Gemini for AI quizzes, Tesseract for OCR, enabling secure, scalable classroom and assignment management.

Solution Benefits

Functional Benefits

- Simplifies teaching by unifying tools - Saves time with automated attendance and grading - Enables AI-powered quiz creation and OCR for handwritten notes

Emotional Benefits

Teachers feel confident, less stressed, and proud of organized teaching. They gain peace of mind, satisfaction from student success, and trust in reliable digital support.

Social Benefits

Teachers earn respect as modern educators, build credibility with peers, strengthen collaboration, gain trust from parents, and show adaptability to digital education trends.

Macro Benefits

Our LMS empowers teachers, improves student learning, reduces wasted effort, and promotes digital adoption in education, boosting productivity and lowering costs.

Macro Analysis

Favourable Trends

AREA	DESCRIPTION
Technology	Digital classrooms drive demand for unified LMS.
Technology	AI & OCR automate quizzes, grading, and notes.

Unfavourable Trends

AREA	DESCRIPTION
Technology	Resistance to digital adoption slows LMS growth.
Economy	Budget cuts in schools limit investment in new tools.

Data Sources:

Teacher resistance to digital tools slows LMS growth, while school budget cuts restrict investment in new technologies, making sustainable adoption harder.
